ECONOMY.

There is a medium between prodigality on the e hand, and avarice on the other, generally regnised under the title of economy, which has gaged the attention of individuals and nations, m the first dawn of civilization. It is a medium some respects not easily obtained; all being ore liable to pass her unnoticed, and glide into se of those dangerous extremes, which constantly kend her. With her right hand she gently ads wealth—her only offspring; and with the it, gracefully reclining on her breast, she indites that mental serenity which dwells within,er gait is majestic—and her countenance beams ith intelligence; in fine, in her seems to be conintrated all those principles which are calculated immortalize a king, or felicitate a nation. At her proach poverty flies aloof, within her temples alness and plenty are always present. But into hat depiorable situations, will a deviation from regulations plunge the unhappy subject-beseized by prodigatity he will seemingly enjoy nuelf, but it will be only to heighten his fall in the abyse of misery-or, attracted by avarice. e will be doomed to drag out a miserable exisnce; denied the comforts and conveniencies of ciety. In the eyes of a wise man, the miser apare truly despicable; who can view with secret light, the increasing pile, ignorant of its intrinc value, and at the privation of every human breath of blooming roses.

Most dear to Campbell, is the gentle majesty of autumnal evenings, when the tears of Heaven embalm the expiring flowrets, when the last sigh of departing summer, yet lingers on the air, and the pale stars look silently on the quiet melanchely of the scene below.

him, who chooses that just medium, for with prudence are his affairs conducted, and he readily wes, "ber ways are ways of pleasantnes nd all her paths are peace." GORGIUS.

Consolations under Affliction.

Consolations under Affliction.

Most readers are acquainted with the journal of the intrepid traveller, Mungo Pack, in the interior of Africa, and whose fate has never been satisfactorily ascertained. The following very judicious extract, however, from its beauty, and enming from a man nearly home down under the heaviest trials we can well conceive of, will not only be interesting to those who have never seen it, but afford some pleasing sensations even to those who have more than once perused it.—Mr. Park had just been robbed by a banditti of almost every thing he possessed, with scarcely any article of clothing left to protect him from the burning suns and drenching rains to which he was exposed, friendless and alone, when the following reflections resulted from his intense sufferings:

"After they were gone. I sat for some

"After they were gone I sat for some time looking around me with amazement and terror. Which ever way I turned, nothing appeared but danger and difficulty. I saw myself in the midst of a vast wilderness, in the depth of the rainy seasonnaked and alone-surrounded by savage animals, and men still more savage. I was five hundred miles from the nearest European settlement. All these circumstances crowded at once on my recollection, and I ronfess that my spirits began to fail me.— I considered my fate as certain, and that I had no alternative, but to lie down and perish. The influence of religion, however, aided and supported me. I reflected that no human prudence or foresight could possibly have averted my present sufferings. I was, indeed, a stranger in a strange land, yet I was still under the protecting that Providence who has condescended to call himself the stranger's friend. At this moment, painful as my effections were, the extraordinary beauty of a small moss, in fructification, irresistibly caught my eye. I mention this to show from what trifling circumstances the mind will sometimes derive consolation; for though the whole plant was not larger than the top of one of my fingers, I could not contemplate the delicate confirmation of its roots, leaves, and capsula, without admiration. Can that Being, thought I, who planted, watered and brought to perfection, in this obscure part of the world, a thing which appears of so small importance, look with unconcern upon the situation and sufferings of creatures formed after his own image!-Surely not! Reflections like these would not allow me to despair.

—I started up, and disregarding both hunger and fatigue, travelled forwards, assured that relief was at hand; and I was not disappointed."

> FOR THE SATURDAY EVENING POST. SABBATH MEDITATIONS.

"Great God of Heav'n, it cannot be That good and evil flow from thee."

The Lord is essential love, and essential wisnbounded in goodness-universal in benevolence—the author of all created existence.—As he is the source of all good, evil cannot possibly exist in, or proceed from him. The sun cannot emit darkness, nor can corrupt water flow from pure fountain. Evil is the perversion of good, and it originates with man, when he converts the holy principles of the Lord into unholiness, and "chan ges the truth of God into a lie." Every influent principle, whether it be natural or spiritual, is received pure, or in a perverted state, according to the quality of the recipient subject. The heat and light of the sun, flowing into certain vegetable forms, produce beautiful flowers, and grateful odours; whilst the same influx into forms of an opposite character, give rise to deformity and noxious vapours. The same light, that is so resplendently reflected by a diamond, is absorbed and rendered pale, when received by minerals of loose and open contextures.

Man, in a state of apparation from God, is alto-gether evil The carriptions of his heart, and the errors of his understanding, become deeply rooted in his soul, and usurp absolute sway over every action of his life. The principles of good flowing into a receptacle so corrupt, soon become converted into evil. But when information is desired. truth commences a purifying operation, that ter minates only with the total expulsion of all evil .-In the early dawn of this state, man is ant to attribute wrath, anger, and vengeance to the Deity, when, in fact, they exist only in himself. Whatever, therefore, may be the limited views, and partial sympathies of man-" The Lord is good to all and His tender mercies are over all His works," AMETHYST.

The characters of some our Modern Poets.

BY AN INBANE GERL Byron is the poet of might and desolation. He was to view nature in her haughtiest aspect, her loves to view nature in her haugitiest aspect, ner darkly blazing volcanes, impetuous cataracts, and sky canopied mountains. He walks unburt "amid the war of elements," fearlessly looking down upon their maddening combats, he wields the thunderbult and commands the storm.

Scott, loves the echo of the bugle-horn, and the chase. To him

joyous exhibitating hurry of the chase, the sweet breeze of morning, the sparking e sweet breeze of morning, the sparking stream, and heath-covered hill are dearest.

Moore, revels in the warmth and splendour of

moon-day. His frank and glowing spirit delights to bask in genial aun-beams; to inhale the volup-tuous sigh of Summer sephyrs, and the balmy breath of blooming roses.

But those, Souther, bard of sparking fiction and mysterious beauty, what words can describe thee. Thou, who enjoyest life in every element, wield unrivated thy wand of all-subduing magic—Pursue thy flight through the cerulean regions, couch thyself on the passing clouds, and robe thyself in the many coloured rainbow—dwell in the palaces of living flame, or wander in the coral hall thou hast raised in ocean's bosom, all are familiar to thee, for thou commandest all.

Scene at the Reading of a Will.

As the tanner's widow waxed sickly and infirm, she became an enticing object for Mrs. Doldrum, an inhabitant of Leighton Buzzard, one of those human screech-owls who prowl about the abodes of misery and death, croaking out dismal tidings, and hovering over corpses. She seemed only happy when surrounded by wretchedness, and her undertakerlike mind approved to five upon death. When she could not treat her-self with a dissolution, she would look about her for a broken leg, a bankruptcy, a family where there was a dishonoured daughter, a runaway son, or any calamity she could by good fortune discover.—"O my dear friend," she exclaimed to Mrs. Pitman, a short time before her death, " I am so delighted to see you, (here a groan)-you know my regard for you, (another groun) -seeing your bed-room shutters closed, I took it for granted it was all ever with you, so I came in just to close your eyes and lay out your body. Delighted to find you alive, (groun the third)—let us be of good cheer, erhaps you may yet linger out a week longer, though it would be a great release if it would please God to take you, (groun the fourth)-And yet I fear you are sadly prepared for the next world. (Groan the and longest.) You know my regard for you. The Lord be good unto us! Hark! is that the death watch? I certainly heard a ticking."

This consolatory personage was all alive the moment she heard of Mrs. Pitman's death, which occurred shortly after; and she was obviously in her proper element when superintending the closing of window-shutters, and all the minute arrangements usually adopted upon such mournful occasions. At her own particular request, she was indulged with the privilege of sitting up with the body the first night, and would not even resign her station on the second, which was the time appointed for the reading of the will. Fra k Millington had been sent for express to attend this melancholy ceremony; Mr. Swipes and Mr. Currie were of course present in deep mourning, with visages to match, and each with a white pocket-handkerchief to hide the tears which he feared he would be una bie to shed. Mr. Drawi, the attorney, held the portentous document in his hand, bristling with seals; and two or three friends were requested to attend as witnesses. The slow and precise man of law, who shared none of his auditors impatience, was five minutes in picking the locks of the seals as many more in arranging his spectacles, and, having deliberately blown his nose, through which he always talked, (as if to clear the way), he at length began his lecture. As the will, at the old lady's particular request, had been made as short and simple as possible, he had succeeded in squeezing it into six large skins of parchment, which we shall take the liberty of crushing into as many lines. After a few unimportant legacies to servants and others, it is stated that the whole residue of her property, personal and real, consisting of here a formidable schedule of houses, farms, messuages, tenements, build ings, appurtenances, stocks, bonds, monies, and possessions, occupying twenty minutes in the recital, was bequeathed to her dear cousins Samuel Swipes of the Pond-street Brewery, and Christopher Currie of the

Market-place, Saddler. Here Mr. Drawl laid down his parch ment, drew his breath, blew his nose, and began to wipe his spectacles, in which space of time Mr. Swipes was delivered of a palpable and incontestable snivel, in the getting up whe cof he was mainly assisted by a previous coid; and endeavouring to enact a sob, which however sounded more like gargling his throat, he ejaculated-" Generous creature! worthy woman! kind

Mr. Currie, who thought it safer to be silently overcome by his feelings, buried his face in his handkerchief, whence he finally emerged with indisputably red and watery eyes, though it is upon record, that he had been noticed that morning grubbing about the onion-bed in his own garden, and had been seen to stoop down and pick something up. They were both with an ill-concealed triumph beginning to express to Frank their regret that he had not been named, and to inform him that they could dispense with his farther attendance, when Mr. Drawl with his calm nasal twang cried out, " Pray, gentlemen, keep your seats, I have not done yet;" and resuming the parchment and his posture, thus proceeded Let me see, where was 1? Ay, Samuel Swipes, of Pond-street Brewery, and Christopher Currie of the Market-place,

may safely be intrusted with the large for-tune which I hereby bequeath to him."
"What's all this?" exclaimed Mr

Swipes, "You don't mean that we're humbugged? In trust? how does that appear? where is it?" Mr. Drawi depositing his Mr. Drawi depositing his spectacles, looking up at the ceiling, and acratching the under part of his chin, pointed to the two fatal words, which towered conspicuously above the multitude of their companions, and the brewer's nether jaw gradually fell down till it crumbled and crushed the frill of his shirt. Mr. Currie, with a pale face and goggle eyes, stood staring at his co-trustee, not exactly understanding what it all meant, though he saw by his countenance that there was some sudden extinction of their hopes. As the will was dated several years back, Frank only wanted three weeks of the stipulated posicid of possession, and as he hastily re-volved in his mind all the amoyances he had occasioned his aunt, and the kind generosity with which she had treated him. his eyes remained fixed upon the carpet, and the tears fell fast upon the back of his crossed hands.

OBSERVATIONS ON NAMES.

OBSERVATIONS ON NAMES.

Mr. Brady, in his "Critical and Analytical Dissertation on the names of Persons," thinks that aurnames were introduced into England by the Normans, and are postesior to armorial bearing; as also fo Christian names. Yet some forms of personal appellation must have preceded even the introduction of Christian; though such name were probably not hereditary. Mr. B. appears surprised to find so many colours as White, Black, Brown, Green, and not one Hed; but, probably, this name has been expanded into Reid and Read.

The oldest and most natural names seem to be those that are derived from complexion or stature; as Brown, White, Green, Long, Bhort, Little, Golightly, Heavysides, and others. Many are taken from trades and employment; as Carpenter, Mason, Smith, Wright, Taylor, Gardiner, Cook, Steward, Walker, Trutter and Rider. Others are patronymies; as Richardson, Robertson, Robinson, Harrison, Atkinkon, Johnson, Wilson, Bonaldson, Thomson, Dickson, and Jackson, Pitzroy, and a legion of Soutish Mac's, Irish G's, and Durch Van's. A fourth class come from the place of birth, as Wilton. Boingbrooke, Eaton, Leeds, Camberland, Thorpe, East, West, North, South. A fifth class are names of offices or dignities; as King, Lord, Nible, Knight, Sheriff, Clark; a sixth class are names of animals, vegitables, or uternals; as Swan, Crow, Dove, Herring, Bacon, Butlock, Ash, Hose, Bloom, Patten, Buckle, Hall, Chambers, Kitchen, and a veventh may embrace a variety of Groodshonks, Sheepshanks, Shufflebottoms, Hugginbotand a seventh may embrace a variety of Grookshinks, Sheepshanks, Shufflebottoms, Higginbut toms, Winterbottoms, and others of like unstable

We have a Mr. Light, whose weight is only one stone less than that of the memorable Lambert; and two fadies named Smallman and Littleboy are not far behind him in lustiness. Mrs. Blackmore is one of the fairest women in the world. Mrs. Frate, as is well known, his neen atways deal and dumb; Mrs. Pury is remarkable for her quiet disposition; Mr. Wiseman, is without exception the greatestool in the neighbourhood in which he resides; Ar Lightfoot has lost one of his legs, and got the gour in the other, and poor Miss Okle was born blind.

The Darby Association for discouraging the un necessary use of aident Spirits, being convened for the purpose of considering what steps they can pursue to promote the object they I ve in view, believe that a call on their fellow crizens, and more especially the Farmers, at this season of the year, may have a beneficial effect, and draw the attention of some to this important subject.

The season is now approaching, fellow-citizens, when, apparently, we may receive from the hands of a Bountiful Giver a rich reward for our toil: but can it be said that we are rendering unto Him the gratitude and praise that is due, if in gather-ing the blessings of His munificent hand, we indulge ourselves in the free use of those intraccat-ing Liquors which inflame the passions, which enervate the mind, and draw it from its Creator. which deprives man of his reason, and sinks him below the brute creation; and, in short, is the source from whigh flow most of the evils that de-grade and afflict the human race.

The practice of handing out ardent Spirits in

the time of harvest has long been sanctimed by custom, and probably by many without ever tak-ing a scrious thought of its contaminating effects on the morals and health of the lab uter, and thus many who might otherwise have escaped this dreadful scourge, by becoming habituated the the use of ardent Spirits at this season of the Christopher Currie of the Market-place, Saddler," and then raising his voice, to adopt it to the large German text words that came next, he sang out—"IN TRUST, for the sole and exclusive use and benefit of my dear nephew, Frank Millington, when he shall have attained the age of 25 years, by which time I hope he will have so far reformed his evil habits as that he

ich happy instrument of advancing the cause of Virtue and orality, and largely contributing to the comfort and happiness of his fellow greatures. Nor is this all the consolation to be derived from denying himself and fellow labourers the atmulating draughs. Many have long tried the experiment, and find more labour can be performed, more anti-faction enjoyed, the rational faculties kept in their proper functions, the health of the body better preserved, and the bleasings of Providence gathered without those distressing and disagreeable occurrences which often happen in consequence of the use of ardent Spirits. Let our brother Parmers, then, resolve to unite their efforts in arresting the in-idious marches of this fivies headed monater, armon naise. Let them only try the experiment for the macket, of gathering their approaching harvests without it, and we fully believe they will realize a satisfication which they never experienced while in the practice of using actiont Spirits as an article of drink.

But it is not the farmers only, but the citizens in general, we wish to engage in this interesting subject—and can it he said, that legislative hadden, the guardians of the public welfare, are disharging the trust reposed in them, while they view with indifference the ravages of this evil, which is acknowledged to be "the crying on of the nation!"—can they behold it thus preying on the witals of the community, destroying the talenty of many who might otherwise shime as bright or naments in society, and sinking housands annually into an untimely grave, without exerting their constituted powers to prevent the evil, and out off, in some measure, the sources from whence these complicated miscrice, and also enforce such salutary restrictions on the retailers of ardent Spirits as to render it an object of less profit, and make it penal to sell to a person who was known to use it to the light, in a short time, induce him to relinquish the practice, and also genore such salutary restrictions on the retailers of ardent Spiri

it penal to sell to a person who was known to use it to the injury of himself, his family, or his centre.

If, when the kord's Judgments are in the land, the inhabitants shall learn righteousness, may we not draw lessons of instruction from the aspect of things. The serious and reflecting mind must certainly have discovered that is some sections of our country in latter seasons the staff of life has been cut off, literally speaking, "the stay of bread and the stay of water," and will it be reasonable to expect that while is great portion of that which is given to support life, is converted into an article that destroys both soul and body, and otherwise apreads misery and wretchedness among thomands of the human race, that the bounties of Heaven will still continue to be poured out upon us, or that we shall, as a nation, escape the "chasteling rod," Or as it is righteousness that exalteth a nation, so we may reasonably expect that national evils will be punished by mitional calamities; and when the rulers of a nation or individual state, neglect to make use of the means put into their power to correct the moral evils that prevail among the inhabitants, such nation or state becomes implicated in the crime, and thus it is that "drunkenness of comes the crying sin of the nation."

In closing this address we dealer to encourage individual exertion and the united to-operation of kindred associations that are formed in different parts of the c-u try, that they may discourage, by all proper means, the unnecessary and habitual use of superit spirits, and ethicarous, by preserving and unremitted cairs, to awaken the public mind to the enormity of the evil: for while the streams of intemperance are thus suffered unrestrainedly to force, may we not have occasion to say to our rulers as the servants of Pitaroah did in an afflict-

flow, may we not have occasion to say to rulers as the servants of Pharoah did in an of ing time, "how long shall this [thing] be a snare unto us; knowest thou not yet that Egypt is described."

THE ASSOCIATION.

Darby, 6mo. 2d. 1823. N. B. Printers of Newspapers favourable to the Associa-ion, are requested to give the above an insertion.

A Novel Creed, intended for Quakers, but honorably rejected by them.

The Essay of a creed, from which the following extracts were taken, was adop ed, and printed by "the meeting of sufferings," the representatives of the body of the yearly meeting of Pennsylvania, New Jersey and the Eastern Shore of Maryland, and copied on their minutes, which are annually of the body of the yearly meeting of Pennsylvania, New Jersey and the Eastern Snore of Maryland, and copied on their minutes, which are annually read in that yearly meeting for its approbation.— But so much disapprobation was expressed with it, that the namphiet was ordered. lished. Hence the work was suppressed; but this cannot make it any less true, or any more false; and as it was evidently drawn up by some of the leading members of the society, it is a proper subject for animadversion. A few copies were put into circulation, by some means or other, before the meeting; and all attempts to buy them up since, for the purpose of suppressing them, have proved ineffectual. But we will keep the reader no longer in suspence in regard to this singular production; which contains some truth; but more error; and most of all, that which conveys no definite idea whatever!

definite idea whatever!

After the preamble, which contains inching very exceptionable, and an expression of a firm belief scriptures, which, so far, is certainly very But they are not and cannot be subjected to

the tailer corrupt reason of man.

Now, what is meant by "failen corrupt rea-son?" Is not the reason of man as good now as it ever was?—and did not God address this reason, when he said, "Come now, let us agasen together, saith the Lord; though your sins be as scarlet, they shall be as white as snow; though they be red like crimson, they shall be as woo!?" Isa.i. 18 Here God calls upon somers, whose ams were of the deepest die, to use their region; and on what subject can they exercise it better than in gaining a correct understanding of the scriptures? But only make mankind believe that their reason is so fallen, so deprayed, that they are incapable of understanding the scriptures without subjects understanding the scriptures without subjects of understanding the scriptures without subjects of the completely in their correct and they can be led their table to the terms. more, and they can be led obsequently at your will It is impossible to corrupt teason, it that reason should be corrupted; for although manreason should be corrupted; for asthough man-kind may a reuse a great degree of foolishness, and call it reason, yet reason, to be reason, must act rationally, and when actions are incorrect, it is not reason that acts, but something else. If, there-fore, this creed means, that the scriptures eanned be understood by the "reason of man," in his present state, it either means that which is false, are else it charges God with fully in giving man a quide, and calmag upon him to exercise his reason

with altogether. But the creed continues—
"We receive and believe in the testimony of the
arcipture simply as it stands in the test. 'There
are three that bear record in Beaven, the Father,
the Word and Holy Guost, and these three are

It is presumed that the framers of this cree it is presumed that the framers of two events were not aware that the above text, on which they have laid so much stress, and the only one which they have quoted correctly, (and the only one, except one, which they have inserted, as a quotation from scripture), is a mere apurious interpolation, from scripture), is a mere apurious interp which is not to be found in any Greek mar of the New Testament written earlier than the fif-teenth century. If they had known this circum-stance, they would not have attached so much ime to this text : but this is a truth, which : acknowledged by the most learned, even amon-the Trinitarians. It is also presumed that the ma-hers of this creed were ignorant of the meaning of the text is effected were ignorant of the meaning of the text is elf, even admitting its authority; for in no more proves that the Pather, the Word, and the Holy Ghost are one being, than it is proved that Paul and Apollos are one being; (1 Cor. iii 8) and any person who has the least knowledge of Greek must know this at the first sight of the text: is every are one; the is one is neuter, and therefore cannot agree with & warns the Father neither with & Asyes the Word, both of which are masculine; but wherever we read of one God, or one Lord, in the scriptures, the numeric: ad jective is invariably masculine, "God 16, 1971 ir one" Gal. iii 20 Eig Brog one God, and rig parires out mediator, &c. 1 Tim. ii. 5. Ele noting one Land, min wivrig one faith, it Barriera one haption. Eph. iv. 5. In this fast text all three of the genders are used. The meaning of the text, therefore, let it be written by whom it may, is nothing less nor more than this, the three who hear witness in heaven are one in testimony; as it is stated, ver. 8, "these three agree 414 To is in the one; i. e. in one and the same testimony. Let the text, therefore, be thus explained, which is undoubtedly its true meaning, and it contains no more than that to which any one

But again,
"We believe in the only wise and omnipotent and everiasting God, the Creator of all thir beaven and in earth, and the preserver of all beasen and in earth, and the preserver of an tings he hath made, who is God over all blessed forever. The infinite and most wise God, who is the foundation and spring of all operations, hath armight all things by his Eternal Word and Son; that is that Word which was in the beginning with God, was God, by whom all things were made, and without abom was not any thing made that was

Eternal Word and Son." This is what is called believing "in the testimony of the scriptures simply as it stands in the text." But where do we read in the scriptures of an eternal Son? The idea cialiy absuru! A son must be begotten and (orelse create as Adam was) before he can a Son, and to call such a being an eternal being, in abourdity! But the creed (after a few statements to which we do not object) continues—
thence he (Christ) is the only mediator be

tween God and man, for having been with God from all eternity, being himself God, and also in time partaking of the nature of man, through him was the goodness and love of God conveyed to mankind and by him again man partaketh and re ceiveth his mercy "
having been with God from all eternity.

Here the words of John, " from the beginning, which may mean the beginning of the gospel dis persation, but at most can mean no more than the beginning of creation, these creed makers have changed into their own words, "from all eternity." my thing that was with God "from all eter was, and therefore, if this be God, as well a that, it makes out two Gods as clearly as two and two make four! Passing on in the creed, we notice the failuring God is willing to be reconciled to us and

ready to remit sins that are past if we repent."

Astonishing! How can God, who changeth not be willing to be otherwise than what he is? And how can vain man suppose that any thing which do may produce a reconciliation, in God he willing to be reconciled, is he not equal willing to effect that which will make him so scriptures do not testify of any unreconcilia in he mind of God; but God " was in Chris ion in he mind of God; but God " was in Chrisecouriling the world unto himself," &c. 2 Cor. 19 not saying that he is willing to be reconciled to the world; because this would imply that he is changeable as well as man. That God forgiveth repentance, we readily admit : but if he on repentance, now, as he always did, it be supposed that he doth this for the sake, or on the account of something clse which he has received as a satisfaction in the room and stead of that punishment which the sinner is served. always will forgive the truly penitent, merely be cause " he delighteth in mercy." But the creed

- he (Christ) is the word of faith and a quick oning spirit in us, whereby he is the immediate cause and author of our living faith in his name and power, and of the work of our salvation from an aid the bondage of c reuption.

This, didess they mean to speak of Christ figumantelligible, but if this be their meaning why did they not use language more definite, and less hable to be misconstrued? One great object in having a creed, is, in having something plain and explicit, and easy to be understood, in and through which professing christians may unite in a kind of spaceousl and be avenly union.

Speaking of believing unto justification, thecreed

but the way to come to that faith is tore ceive and oher the manifestation of his divine light and grace, in the conscience, which leads men to believe and value, and not to disown and under-value Christ as the common sacrifice and media-tion. For we do affirm that to follow his holy lightion. For we do affirm that to follow his holy light in the conveience, and to turn our minds, and bring all our (Coughts)" deeds and thoughts, so it is the readilest way, the only right way to have a true living statisting faith in Christ as he appeared in the fleshi and to discern the Lord's body and coming and and ring aright, and to receive any real benefit by him, as our only sacrifice and mediation according to the beloved disciple's emphatic testimany, "If we walk in the light as he (God) is in the light, we have fellowship one with another and the blood of Christ cleaness from all ain." By the propitiatory sacrifice of Christ withsin.' By the propitiatory sacrifice of Christ with-out us, we truly reporting and believing by the mercy of God, justified from all imputation of sin mercy of Gid, justified from all imputation of ain aid transgressions that are past, as though they never had been committed; and by the mighty work of Christ within us, the power, nature and shabits of sin are flextroyed, that as sin once reigned unto death, so now grace reigneth through righteouseness unto elernal life by Christ Jesus our Lord. Signed on behalf of the meeting.

reason is no guide to line; he must therefore sit in silence; and take it for granted that what they say is true! It will be readily perceived, however, that, upon this principle, the scriptures are of no of Christ within we?—what is this mighty work of Christ within we?—what is this mighty work of Christ within we?—what is this mighty work? What sine have been inputed to us, more than what we have personally committed? What proportion of the mighty work here speken of belongs to our "truly repenting and believing?"—what to the sacrifice of Christ without us?"—and what to "the mercy of God?" For it seems that, according to the above greed, all have comething to to "the mercy of God?" For it seems that, according to the above creed, all have something to do in the case; and how is any one to know or understand what is to be performed by himself, what has been done for him by Christ, or for what must be depend wholly on the mercy of God? Is it at all to be wondered at that the younger part of the society, whose minds are yet open and free to judge for themselves what is rational, were almost to an individual disposed to reject this creed? But it has taught them a good lesson, and we hope that old as well as young will profit by it. It will teach those whose minds are not fully established, not to place such implicit confidence in the supposed guidance of the spirit in their spiritual leaders, as they have heretofore done. For if they have the spirit of God to direct them, they certainly stood in the most need of it when they were framing a creed, which was designed to give a proper ing a creed, which was designed to give a prope direction to the minds of all the society, particularly to the young people. But will any one be lieve that the above creed was ever dictated by the spirit of God? If so, the medium of communica-tion was certainly an unfortunate one; for much of it either has no meaning at all, or else its mean ing cannot be understood from the words used to express it. Let Friends, (a dozen of them or so to try the experiment) undertake to answer the questions we have proposed, and let them all a gree to answer them according to their underof the creed, and see how many, or how answer them alike. And if they cannot agree themselves what it means, how could it have been any guide to others? It is doubted whether the framers of this creed, themselves, (for it is the framers of this creed, themselves, (for it is supposed there must have been more than one, would agree in all points relative to the questions we have proposed. We congratulate the young Friends on their success in checking in the bad an attempt, as we conceive it to be, to lord it over their faith, so as not to let them judge for them selves in matters of religion, or at least, not to be permitted to express their judgment, unless their opinion should coincide with that of their spiritua guides. It is manifest, to all who are acquainted with circumstances and facts, that this creed was designed to have a particular bearing on an indi vidual, whose boldness and independence of mind has occasioned, of late, some considerable excite has occasioned, of late, some considerable ment among Priends; but the veil was too thin, and the more libe all minded discovered the fetters which were to bind down the mind, and prevent the private were wholly fastened free inquiry, before the rivets were wholly fastened upon them. We sincerely hope that this will be a good lesson to all creed-makers in future. We can good lesson to all creed-makers in future. We can assure the Priends that we mean them no harm nor even disrespect, but verily a kindness, by the liberty we have taken. FROM THE PHILADELPHIA RECORDER.

Messus. Entrons—Among a packet of letters, recently received from London, I have found one which appears to have been written by a British officer, while on a visit in America, to his friend, Lord ——, in London. Believing it would be interesting to the public, I forward you a copy for publication.

"Niagara, Upper Canada, North and America, January 1, 1823.5
"Mr Lonn—When I last wrote you, I was in the city of Boston, from which I have travelled by land to the King's dominions, in the upper province of Canada, where I have taken up my residence until I shall have had a suitable opportunity of immediate the curiosities of this part tunity, for inspecting the curiosities of this part of the country. I have already been highly deof the country. I have already been highly de-lighted with several, of which I will give you a short description. The first that attracted my at-tention was the Great Ridge Road, extending from Genesce river to Niagara, the length of or hundred miles. This ridge is sufficiently wide for a large state road, and to furnish the inhabitants with building ground, and with good water preferable to Thames. Some imagine this to be the work of art, the remains of some antique for tification, but I should rather suppose it was formerly the bank of Lake Ontario. The next cu riosity which greatly interested me, was the Falls of Niagara. Although I had frequently seen a description of this wonderful cataract, yet I could form no just conception of the immense body of water, the huge ledge over which it is pressed, the volumes of mist which continually darkens the skies like a large cloud, the variegated rain the skies like a large cloud, the variegated rain-bow forming an arch of unrivalled grandeur, the quaking of the ground, and the thundering of the water, falling 160 feet; which may be distinctly heard at the distance of thirty miles. Never un-til now, could 1 bring my imagination to corres-pond with the majesty and sublimity of such a scene; which, although the visitor beholds with the highest pitch of admiration, he is seldom seen the aignest pitch of admiration, he is seldom seen to smile. An awful solemnity gathers in his countenance, while his mind is fixed in deep contemplation. On the sides of the river, which seeparates the state of New York from the British doministrate of the counterpart of the state of the counterpart of the state of the counterpart of minions, no particular fall of ground is discover-ed. The fall is only in the channel of the river, across which, the ledge of rocks rises like a dam, and over this an immense weight of water pours shooting over the space fifty feet, and visitors, who have the courage to descend the ladder, may who have the courage to descend the ladder, may walk under the vast columns of water, which are poured with such fremendous force, that small fish being carried down the current, are continually dashed in pieces on the unseen rook. It is evident, by the appearances on both sides of the river, that the falls formerly were as far down the river, that the falls formerly were as far down the river towards Lake Outside as Lewiston and river, towards Lake Ontario, as Lewiston, and that a channel, one hundred and sixty feet doep ha been cut by the water through a ledge of rock, for the space of seven miles. The The thou sands of names which have been engraved by visi-tors for a century past, on the bank of the river at the falls, convince me, with the testimony of the eldest men in their vicinity, that the ledge of the oldest men in their vicinity, that the falls are rockin gradually wearing away, and the falls are yearly becoming higher up the river. This ledge, I think, by the appearance does not extend much farther up towards Lake Erie, and when the water comes to the extremity of the rock, it may in the space of an hour out a channel one hundred and

We are indebted to a friend for Spanish Gazettes to the 1st of May, brought by the arrival last Sunday, of the Spanish Letter of Marque, from Cadiz. They contain several interesting articles relating to the unholy war which has been warred against that unhappy nation. Although waged against that unhappy nation. Although French troops have advanced far into that country, and ere this have probably reached Madrid, yet mough appears to show that the work is not finished. The Seville papers to the 1st of May, represented that great and energetic measure by the Spanish government in adopting by of the different the different provinces were organizing lives with the greatest activity. The weal themserves with the greatest activity. The wear-thy inhabitants were withdrawing from the towns and cities likely to be invaded, as also the youth-ful part of the population. Catalonia, that was a short time since very anti-constitutional, with that peculiarity of character which distinguishes the spanish nation, is now the greatest foe of France. The famous *Empecinado* has taken up arms again in defence of his country's rights, and has issued an enthusiasiic proclamation, avowing his inten-tion to perish in her cause. The no less noted Chaleco has also come out with the same sentiments, and likewise many others. It will be re-collected that these two men are the celebrated Guerrilla chieftains, who were the scourge to Na oleon's veterans.

And it also appears that the commanders of the different military districts were actively engaged is organizing their armies. Count Abisbal has made extraordinary preparations to defend Madrid, and it is stated in the Seville papers he has a brilliant corps of 12,000 men, and that he is resolved upon making a strong resistance.

The Cortes have made regulations for the corps of foreigners, that have been raised and were raise ing, as also for the guerrillas.

Capt. Erwin, of the ship Pennsylvania, 49 days from Rio, states that business was very dull at the time he left. About 14,000 barrels of flour on hand, which retailed at \$7 to \$9. The supply of grain and flour adequate to three or four months' consumption, and if further arrivals took place the price would decline. At Buenos Ayres, 15th April, there were 20,000 bbls. on hand, 8000 of which remained unsold. At Lima, 22d Feb. flour was \$9, on board, nominally; 12,000 bbls. in market. The market was considered super-abundantly supplied with merchandize of all kinds, and little. hard money circulating, excepting a copper coin the size of a cent, which was considered by government, and passed for a quarter of a dollar. The Emperor would open the Cortes of Brazils in great state on the 3d of May .- 15,000 men had arrived from Lisbon at Bahia early in April. Lord Cochrane's squadron had not then got there-two fire ships had left Rio to join him. No business was doing at Monte Video.

STEAM BOAT BURNT.

Montreal papers received at New-York, an nounce that the elegant steam boat, De Sallaberry, was burnt on the 12th inst. When the flames were discovered they had made such progress as to be inextinguishable, and she was run on a chain of rocks. As soon as the accident was perceived by the steam boat La Prairie, then above three miles ahead, she ran down to her assistance, and, in concert with two boats despate hed from the shore on the same humane errand, took off such passengers as had remained on the wreck, some of whom had taken refuge in the chains and rigging, and whose distress may be more easily imagined than described. Many, indeed, of the more adventurous jumped overboard, before the La Prarie had reached her, but it is believed that few, if any lives were lost. She the drifted with the flood tide into the middle of the river, and when last seen was burnt to the water's edge. Both boats had left Quebec about two o'clock the same morning; the De Sallaberry with about 150 passengers (principally emigrants) and a valuable cargo, all of which was lost; and the La Prairie with 120, mostly of the same description.

An interesting debate has taken place in the British House of Commons, on the subject of Stavery, and petitions were pouring in from all quar-ters of the Kingdom; against the iniquitous traffic. The petition to Parliament from Manchester, for the abolition of the slave trade in the British colonies, contained 29,666 signatures, and was 196 feet long. The Leeds petition was signed by 9400 names. Mr. Canning was of the number of speakclose of his speech he read certain resolution which stated it to be expedient to effect a gradua abolition of slavery, that the House was anxious for it at the earliest period consistent with the well being of the slaves themselves, and the safety of property, &c. in the colonies. The resolutions were adopted.

IRELAND.

The state of Ireland is such as to excite much alarm, and is every day becoming a subject of still more fearful interest. The southern counties present a scene of unaltered wretchedness, A large party of insurgents had made a regular attack upon the village of Glanssheen, county of Cork, with the intent of burning it and murdering the inhabitants. The 71st segiment arrived in time to prevent the intended act. At Killcullane a family of sixteen persons were enclosed in a house which the insurgents had set fire to in four different places. Fortunately the police arrived in time to prevent the horrid act which was intended. The present disturbances are infinitely more formidable to government than an organized rebellion would be, because, its force is harrassed to death by an invisible enemy. Appearances certainly favour the supposition that a crisis of some such nature is not far distant. An interval of torpor will next succeed, till the miserable and neglected population, again spurred on by the excess of its misery, shall rush into fresh violence and excess. The Old Times says—Instead of a limited monarch and a loyal nation, Ireland has for ages presented to us the picture of a despotic oligarchy, and a people incessantly plotting or executing schemes of bloody insurrection. The picture remains unchanged : but it seems on all sides admitted that a fresh grouping of the figures is now unavoidable. The insurrection act, an imperfect, but we believe indispensible expedient, has been again proposed by the Irish Minister to Parliament.

Great advantages attends fixing teeth in the mouth on stumps, they never injure adjusting teeth, and in almost every instance are fixed in without pain, and when it is necessary to give pain, the Dentist can always inform beforehand, also, whether teeth can be fixed in, so as to be of real

or lasting service, or not When one tooth in front breaks off, the inconvenience is not very great, and the stump is neglected, but when more than one tooth be the inconvenience is truly serious, and the unfortunate person is sure to lament his great and irre-parable misfortune that he did not know the im-portance of an early application to the Dentist, as by this time the stump of the tooth first broken, has become so carious as almost to prectude the possibility of fixing a tooth firmly upon it

The teeth Williams furnishes are very strong and serviceable and do not lose their proofs, nor their colour, nor injure the breath, and only require to be seen to be approved.

very many persons greatly suffer with decayed stumps in the back part of the mouth, they pro-duce a bad breath, a had taste in the mouth, are injurious to health, and destructive to adjoining teeth. Williams extracts the most difficult stumps with great safety and with au little pain as is sure to astonish every one—and continues to perform very operation in the line of his profession on his

A CURIOSITY.

A MR CIBRS. Lattery Broker of this city, has been to cently exhibiting in this state random piece of mechanism, said to be the work of an Italian A tist. It consists of a box floor inches duncy three wide, and two degreed fine gold. On one end to a bodd low-on the other a lid open and discloses an eight day time peake which, lesides striking the hours and quarters, plays a matcher of one titule a spring, a pleture on the rop of the box tises slowly, and discovers a bird according from below. The bird is about an inch in length; of plosnoge the most right and yet the most nature. It sings with activiting a weetness, and yet the most nature. It sings with activiting a weetness, and companies its noile with all those motions moment to a living bird—its lead turn from side or the life little full occurs, and its throat weeths at every note, and its whoge and tail spread and contract thories the you. After the parting and mishing its serious, it drops upon its gold n next, descends to its retreat, and the ind wintly loves to its place, may 11—xt.

EULHOTUSL.—Henry IV (or Quatre) is one of those few who justly deserve the name of a good king. As such he was prized by his subjects.—When the intelligence of his death reached Paris, nothing was heard but cries of "we have lost our father." And from the time of the death of the fixed Buschin they were sensitived to carry father." And from the time of the deam of the Grand Dauphin, they were accustomed to carry their tears and their complaints to the fioot of his statue. It was a benevolent wish of this great man that the poorest pessant might have a fowl to put in the pot every flunday.

OAHARTERO THE MILITIA.-A militia captain of one of the northern states, during the late war, being told that a regiment was to be organized for some special service, exclaimed—" The darned fools, they'd better stick to the drum and fife than go to the expense of buying organs."

CHARITY.—" Charity," says an old writer, "is a virtue of the heart and not of the hands.—
Gifia and alms are the expressions, not the easence of virtue. A man may bestow great sums on the poor and indigent without being charitable, and may be charitable when he is not able to bestow any thing. Charity is, therefore, a habit o oses us to the love, assistance, and relief of man kind, especially of those who stand in need of it. The poor man, who has this excellent frame of mind, is no less entitled to the reward of this virue, than the man who founds a college."

EARLY RISING.

The difference between rising at six and rising at sight, in the course of 40 years, supposing a person to go to bed at the same time he otherwise would, amounts to 29,000 hours, or three years, 221 days, and 15 hours—which will afford sight are a day for exactly ten years—which is, in f the same as if ten years were added to the period of our lives, in which we might command eight hours every day for the cultivation of our minds and the despatch of business. This is a result of early rising, which, besides, that it contributes so much to our general health, is deserving of se-rious consideration.
